

We love building great websites! We know that designing a website can be overwhelming for most people, so we have designed three fundamental steps we take people through to achieve the best possible website. Because these steps eliminate a lot of unnecessary work, we are able to achieve the great results we do. Additionally, our pricing structure is based on building a website one page at a time virtually eliminating the usual high costs associated with building a site.

#### HOME PAGE

As the home-page is where the essential design takes place for any website our price is \$278.

Note: If we determine during the brief that a simple design is required than the price is \$178

#### ADDITIONAL PAGES

Additional pages range from \$78 - \$178 depending on the complexity (usually \$78 per page)

#### HOSTING

As we have our own server we also host websites at the very competitive price of \$13 per month. This includes:

- Your website name registration. i.e. www.yourwebsite.com.au
- Twelve months hosting.
- Up to ten email addresses of your choice: i.e. your name@yourwebsite.com

To commence any of the above work we ask that the first payment totalling \$156 which covers 12 months hosting, your email addresses and website name registration be paid in full. If you prefer to host elsewhere we request the cost of the home page become your deposit. All other payments are upon delivery of the completed work.

GARDEN READY ORGANICS

As you are most probably aware logos can cost many thousands of dollars to design. When thought through well however can save you lots. Our effective logo formula design process is the most economical way to get a great design done quickly and cheaply. Our logo designs range from \$78 for text only logos to \$178 for graphically designed logos.

Design

Our design work includes:

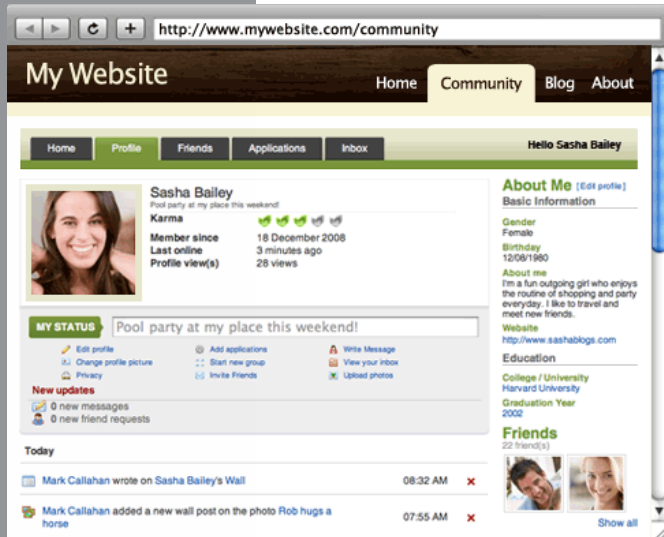

- business cards \$28\*
- catalogs and brochures range from \$38\* to \$137\* per page depending on the complexity.

\* DOES NOT INCLUDE LOGO DESIGN
